

cactus.
MANCHESTER

LOCATION
MANCHESTER

SYSTEM SIZE
6.16 KW

COMPONENTS
16 SOLAR PANELS

ANNUAL CO2 SAVINGS
1,246 KG

"I was very pleased with both the experience and the outcome: Cactus put a lot of initial thought into scoping the work to ensure the project was done in a way which would generate the best possible return, and the team were friendly and helpful throughout, keeping me informed and carrying out the work when they said they would. I am now near-enough self-sufficient in electricity for the summer months, and generating a good contribution for the rest of the year. The in-built panels also look really good. Overall, I'm very pleased with the result."
